Representative Cases

In a career spanning more than thirty years, Mr. Rhodes has successfully represented his clients in numerous matters before state and federal trial courts, courts of appeal and the U.S. Supreme Court. In addition, Mr. Rhodes has extensive experience in international litigation. Below is a list of representative cases:

- (District of Delaware) In 1987, General Electric sued Hoechst Celanese Corporation on a patent relating to engineering resins (polyethylene terephthalate/polybutylene terephthalate blends). As part of the team representing Hoechst Celanese, Mr. Rhodes was part of the successful effort that led to a judgment of invalidity of the re-examined General Electric patent. The case was successfully concluded in 1990.

RHODES

ATTORNEYS AT LAW

a professional corporation

- (Intel Corporation) In 1992, Mr. Rhodes began a secondment at Intel Corporation as the manager of its patent litigation section. In this position, Mr. Rhodes oversaw patent litigations involving IBM, AMD, and Cyrix. In addition, Mr. Rhodes successfully represented Intel before the Federal Trade Commission. Mr. Rhodes concluded his secondment in 1995.
- (Intel Corporation - International Litigation) In 1994, Taiwan semiconductor manufacturer United Microelectronics Corporation (UMC) started making clones of Intel's 486 microprocessor, marking them "Not For Sale in the United States." Mr. Rhodes was assigned the task of conducting the first foreign enforcements of Intel's patent portfolio. Mr. Rhodes developed the strategy for enforcing Intel's patents against UMC and oversaw the litigation commenced against distributors in Britain, Germany, Singapore and Hong Kong. In addition, Mr. Rhodes managed the efforts to defend against challenges to Intel's patents in Taiwan and Japan. The effort was successfully concluded in 1996 by a settlement agreement wherein UMC agreed to exit the 486 microprocessor business and agreed to pay Intel's \$5 million dollars in legal expenses.
- (Korea - International Litigation) In 1995, Mr. Rhodes was asked by Celanese Corporation to oversee the enforcement of patents covering its low-water acetic acid manufacturing technology against Samsung-BP. Mr. Rhodes' efforts resulted in the successful defense against Samsung-BP's attempts to invalidate Celanese's Korean patents, and the successful enforcement of Celanese's patents in the Korean courts.
- (Taiwan - International Litigation) In 1998, Mr. Rhodes led the successful effort to enforce Celanese's low-water acetic acid manufacturing patents against Taiwan's China Petrochemical Development Corporation.
- (District of Delaware & Central District of California) Between 2000 and 2006, Mr. Rhodes led the effort to defend an eight patent case brought by LG Electronics against Taiwan-based Chunghwa Picture Tubes over thin-film transistor (TFT) technology. After invalidating six of the eight patents, the case was successfully settled in 2006.
- (Central District of California & Los Angeles Superior Court). In 2005, South Korean biotech company HIF-Bio brought suit against Taiwan-based Yung Shin Pharmaceuticals in Los Angeles Superior Court, alleging theft of intellectual property and claiming in excess of \$280,000,000 in damages. The suit alleged an action under the Racketeer Influenced & Corrupt Organizations Act (RICO), along with allegations of fraud, breach of contract, theft of inventorship, and numerous other state law causes of action. Mr. Rhodes removed the case to Federal Court, where he successfully defended

against the federal court's effort to remand the case to state court by successfully challenging the remand order before the U.S. Court of Appeals for the Federal Circuit. In 2010, Mr. Rhodes obtained dismissal of HIF-Bio's cases in both the state and federal courts.

- (Supreme Court) In 2009, Mr. Rhodes successfully represented California-based Carlsbad Technology Inc. before the U.S. Supreme Court against South Korea-based HIF-Bio over an issue of federal appellate jurisdiction, achieving a 9-0 victory in a case characterized as "highly complex and unusual."
- (Philadelphia District Court - Pending) In 2010, Mr. Rhodes took on the defense of Fivetech Technology Inc. in a patent and trademark suit brought by Pennsylvania-based Southco, Inc. The case alleged infringement of three patents and two trademarks. On motions for summary judgment, Mr. Rhodes obtained judgment of non-infringement of two of the three patents in suit and judgment of non-infringement of the two asserted trademarks. The judgments were affirmed by the U.S. Court of Appeals for the Federal Circuit. In a concurrent inter-partes reexamination in the U.S. Patent & Trademark Office, Mr. Rhodes obtained a judgment of invalidity of two of the third patent's independent claims.

Other Matters

In addition to litigating in state and federal courts, Mr. Rhodes has counseled clients on a variety of intellectual property matters, including patent infringement issues, patent validity issues, and anti-trust related IP issues. In addition, Mr. Rhodes has drafted numerous patent applications, prosecuted applications before the U.S. Patent & Trademark Office, and represented clients in Patent Office appeals and post-grant proceedings.

Mr. Rhodes is a frequent speaker and lecturer on patent issues, and has taught law school courses on trial advocacy and legal research and writing. In addition, Mr. Rhodes is the past co-author and editor of the Patent Law Handbook (West Publishing). Mr. Rhodes has been listed in Euromoney Legal Media Group's Guides to the World's Leading Patent Law Experts, the International Who's Who of Patent Law Experts, and in Intellectual Asset Magazine as a top Global IP Strategist.
